

A woman with long, wavy brown hair, wearing a dark blue tank top, is seated in front of a fireplace. The fire is burning brightly in the hearth, and the mantel above her is decorated with various items, including a small lantern. The lighting is warm and intimate.

Sagewell | Quantum Therapeutix™
Rehabilitating CPTSD, PTSD, and Dissociation

– About Cherie

Cherie Doyen is reshaping how we understand trauma, sensitivity, and the brain.

She speaks with clarity: **CPTSD is not a mental illness — it is a brain injury** that separates the self.

When trauma overwhelms the system, the astral body abandons the physical body, leaving just enough life force to keep moving through the world.

Many live their entire lives in this fragmented state, believing it normal to witness themselves from above.

Cherie created Quantum Therapeutix™, a modality born of necessity when traditional healing said, 'We can't help you.' Through Sagewell, she brings her full psychic and intuitive vision into the process, guiding highly sensitive and gifted people to resolve CPTSD, PTSD, and dissociation — and to unlock and direct their innate gifts with precision.

– About the Work

Not everyone who experiences childhood trauma develops CPTSD.

The numbers tell the story:

- **70% of children today are being traumatized.**
- **30% of people carry the newly evolved highly sensitive brain.**
- **Only 12% of trauma survivors develop CPTSD.**

The distinction? Those who do are the highly sensitive. They are psychic, empathic, brilliant. Their brains respond differently to trauma, and the injury is different.

CPTSD is not a life sentence. It is an injury. And it can be resolved.

Dissociation

This is not coping. This is our consciousness engaging the ultimate fight-flight: abandoning the body.

By definition, dissociation is the separation of one thing from another. In Quantum Therapeutix™, it is understood as an actual separation: the astral body leaves the physical body.

“Dissociation is the same mechanism as astral travel — survival brilliance accessed out of fear.”

Here's the paradox:

- This very ability is a mastery-level skill required for astral travel, quantum jumping, time travel — any out-of-body journey.
- But when accessed out of fear and necessity, it becomes dissociation: the same brilliance of separation, but engaged for survival when the body is not safe.

Many live their entire lives this way, witnessing themselves instead of living.

QT restores integration — returning choice to the traveler, so the astral body and physical body reunite in coherence, and sensitivity becomes mastery.

– Quantum Therapeutix™ + Sagewell

Quantum Therapeutix™ (QT) is not therapy. It is not symptom management.

QT is a direct rehabilitation process for the injury of CPTSD, PTSD, and dissociation. Where traditional systems treat dissociation as a concept, QT addresses the actual separation — the astral body leaving the physical body. It restores coherence, reunites what has been split, and returns choice to the individual.

“Quantum Therapeutix™ reunites the astral and physical — restoring coherence and returning choice.”

This is why transformation happens quickly: the program of trauma is dismantled, the brain reorients into coherence, and the self comes fully home.

Sagewell is where Cherie brings her full psychic mastery into the process. Here, clients not only resolve CPTSD, PTSD, and dissociation, but also learn to wield their sensitivity, empathy, and psychic abilities with intention — turning survival brilliance into conscious mastery.
